PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with hands-on experience designing scalable, production-ready systems using NestJS, PostgreSQL, and Redis. Proficient in building multi-tenant architectures, event-driven workflows, and secure APIs incorporating RSA encryption and robust authentication mechanisms. Committed to delivering maintainable, high-performance applications with clean architecture and solid engineering principles.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React, Next.js, Tailwind CSS, Framer Motion
Backend	Node.js, Express.js, NestJS
Databases	PostgreSQL, MongoDB
DevOps & Tools	Docker, Redis, BullMQ, AWS S3, Git, GitHub, Postman, Vercel
Security	JWT, RSA Encryption, Role-Based Access Control, Cookie-Based Sessions

WORK EXPERIENCE

Quality Assurance Tester · WitCorner

Jun 2023 – Dec 2023

- Executed manual functional, usability, and cross-browser testing across multiple device types and environments.
- Analyzed software requirements and collaborated closely with developers to identify, reproduce, and resolve defects efficiently.
- Documented and tracked bugs through their full lifecycle, ensuring timely resolution and comprehensive regression coverage.

Technical Intern · Depasa Marine Limited

Feb 2023 – Aug 2023

- Supported team operations through effective task coordination, prioritization, and cross-functional collaboration.
- Contributed to internal communication processes, meeting documentation, and project timeline adherence in a fast-paced environment.

PROJECTS

Velto — Full-Stack Developer

Tech: *NestJS, Prisma, PostgreSQL, Redis, BullMQ, Docker, Twilio, SendGrid*

- Architected a multi-tenant backend with wildcard subdomain routing, enabling fully independent storefronts per tenant.
- Designed an event-driven architecture using message queues for asynchronous notifications across email, WhatsApp, and in-app channels.
- Implemented structured error handling with custom error codes, global exception filters, and consistent API response contracts.
- Developed marketplace and social feed features including posts, likes, comments, and advanced filtering capabilities.

VerifyHub — Frontend Developer (Team of 2)

Tech: *Next.js, TypeScript, Tailwind CSS, React Query, Axios, Framer Motion*

- Built a secure identity verification platform supporting NIN, BVN, and CAC services with client-side encryption.
- Implemented two-factor authentication with OTP flow and session-based access control.
- Engineered bulk Excel/CSV processing with automated validation and comparison logic for high-volume verification workflows.
- Delivered a responsive dashboard featuring real-time verification workflows and detailed activity tracking.

LifeData — Frontend Developer (Team Project)

Tech: *Next.js, TypeScript, Tailwind CSS, TanStack Query, Web Crypto API*

- Developed a multi-step onboarding system with dynamic validation, error feedback, and progress tracking.
- Integrated RSA-OAEP encryption via the Web Crypto API to secure sensitive user data before server transmission.
- Built an admin verification dashboard with real-time identity comparison workflows and audit trails.
- Created a role-based company portal with comprehensive employee management features and access controls.

TAJ Kulture — Backend Developer

Tech: *NestJS, Prisma, PostgreSQL, Redis, BullMQ, Cloudinary, Paystack*

- Architected a DDD-lite, event-driven backend for a streetwear e-commerce platform, leveraging NestJS modules and BullMQ to process inventory updates, transactional emails, and loyalty points asynchronously.
- Implemented OTP authentication with JWT refresh token rotation, Redis-backed OTP storage, and Paystack webhook integration with HMAC signature verification.
- Delivered Gen-Z-focused features including voice review uploads via Cloudinary, a community lookbook with admin moderation, and a referral-based gamification system (Sabi Score).
- Designed the PostgreSQL schema with Prisma including indexing strategies, and containerised the application with Docker Compose for reproducible local development.

VOLUNTEER EXPERIENCE

BCU App — Frontend Contributor — Church Application Project

- Improved usability and interface design for a community-focused mobile application.
- Collaborated with a cross-functional team to build and iteratively enhance frontend features.

EDUCATION

B.Eng. in Materials Science & Engineering · Kwara State
University

2024
